

What is a Mock Test?

A mock test serves as a practice for your future exam. It can provide a measure as to how you may score in your final test. It can also be used as an opportunity to understand how to strategize for the final test. Remember that a test cannot be called as a mock test if it does not simulate the actual test scenario, so make sure that you clearly know the format and the allotted time for the test

Instructions:

1. To begin with, you will be provided with a link which will have access to the mock tests. The tests can be taken in the order of Tata McGraw, Barrons followed by Kaplan. Finally, you will get access to your free Powerprep tests from your account on official GRE website. Don't fail to practice on official tests as they mock final test very closely.
2. You must preferably take the test at home in your convenient times. And it is recommended to sit at a stretch for approximately 4 hours to write the test. Also it is very important to attempt the test along with AWA Section.
4. It is recommended to take 2 to 3 mock tests in a week with an interval of at least 1 to 2 days before the next mock test. You may witness progress in your performance only if you take time to analyse and identify your mistakes.
5. Continue taking these tests for at least 3 to 4 weeks in the frequency as mentioned so as to have substantial amount of experience and preparedness for the final test.

Wish you ALL THE BEST!

Regards,

From
